Dear Dr. Noor Hassan,

This fictional referral requests review of persistent right shoulder discomfort described by Jordan Bennett after repeated overhead activity. This invented narrative supports local redaction testing.

Vitals: Blood pressure 124/80 mmHg; pulse 78 beats/min; temperature 36.5 C. Clinical observations: Comfortable at rest, alert, and speaking in complete sentences. Shoulder movement is mildly limited by reported discomfort; skin appears intact.

Specialist referral - continuation

CONTINUATION - SYNTHETIC REFERRAL, PAGE 2

Assessment: A hypothetical musculoskeletal presentation, with no confirmed diagnosis in this sample. Background history and clinical measurements are included as non-identifying content for comparison after redaction.

Please associate this continuation with Jordan Bennett, MRN TEST-MRN-JB-20593. Dr. Elias Patel is listed as the fictional referring clinician. Administrative staff may use the test number (416) 555-0117 to match records; Casey Bennett is the listed next of kin. The hospital name and clinician names are also intentional redaction targets.

Sincerely,

Dr. Elias Patel
